At the limits of simulation

Galaxy 15 is a machine specially designed to be located in medium / large places, in amusement arcades, luna park, bowling alleys, shopping centres and similar areas.

Ferretti offers the enthusiast 15 filmed virtual sequences, all obtained through the most advanced digital techniques.

The simulator is already planned to work with new rides having characters who interact with the passengers provoking unforgettable emotions in both to children and adults who won't be able to resist taking another ride.

The whole simulator is moved by an oleodynamic system composed by a power unit and 3 hydraulic cylinders controlled by a closed-loop digital system.

Superb quality laser video system and astounding Digital Dolby Surround audio system ensure a simulation at the limits of reality.

Specs:

Simulator at 15 places also available mounted over a trailer.

Simulation System:

3 dof and 6 dof
