High tech stunning simulation

Titan 25 is a machine designed to be located in large places such as theme parks and similar areas.

This 25 places simulator represents a sound investment for the operators of this specific sector who, in a short period, can make considerable profits.

It ships with 15 stunning filmed virtual sequences offered with this simulator. The real secret of its success is the synchronization and realization techniques of the movements with the filmed sequence: this determines the quality level of the machine finally resulting in the purpose to entertain.

A stereo surround, a professional quality image provided by Sony and anatomic seats decisively contribute to a high level of comfort and reality so far unmatched.

Mounted over a trailer at 2 axis, with ABS, pneumatic suspensions, this state of the art simulator is ready to travel at any moment.

All our simulators (Titan 25 in particular) are approved TUV Essen.
